

Technical Data

vertical

Vakuu-Engine, Flame licker

- Hight: 9.05 inch
- Width: 5.51 inch
- Length: 5.51 inch
- Weight: 2.4 lbs
- Piston diameter 1.02 inch, made from aluminium
- Hub piston 1.26 inch
- Engine block from aluminium
- Slide feed casing made from steel and aluminium
- Slide feed made form inch aluminium
- Rotation speed 550 rpm
- Flywheel made from messing and aluminium diameter: 3.19 inch
- Flywheel axle diameter : 0.16 inch
- Stator made from steel, lacquered in black
- Burner made from aluminium with flame regulation lever
- Volume 10 ml. burning time 25 min
- Dimensions can deviate slightly
